

Project Idea:

Garage System

Our project involves creating a garage system that automatically opens its door when a car approaches and remains closed when the garage is full, inside sensors indicate if we have parked cars or not, connected by external LEDs. Components like infrared sensors, ultrasonic sensors, servo motors, LEDs, and Raspberry Pi are utilized.

Team Names:

Ahmed Selim Mahmoud	Machine Intelligence
Hager Mohamed Ahmed	Machine Intelligence
Mariam Hassan Elsaka	Data Science
Arwa Mohamed Ali	Data Science
Karem Elsayed Mahmoud	Cyber Security
